

Lab Objective

Implementing the Application Servers

Lab Procedures

1. On Server01, continuing with the Remote Access Setup Configuration page, under Step 4, Application Servers, click Configure. The DirectAccess Application Server Setup Wizard starts.
2. On the DirectAccess Application Server Setup page, click Finish, accepting the default option selected – Do not extend authentication.
3. At the bottom of the Remote Access Management console, click Finish to apply all the changes for Steps 1 through 4.

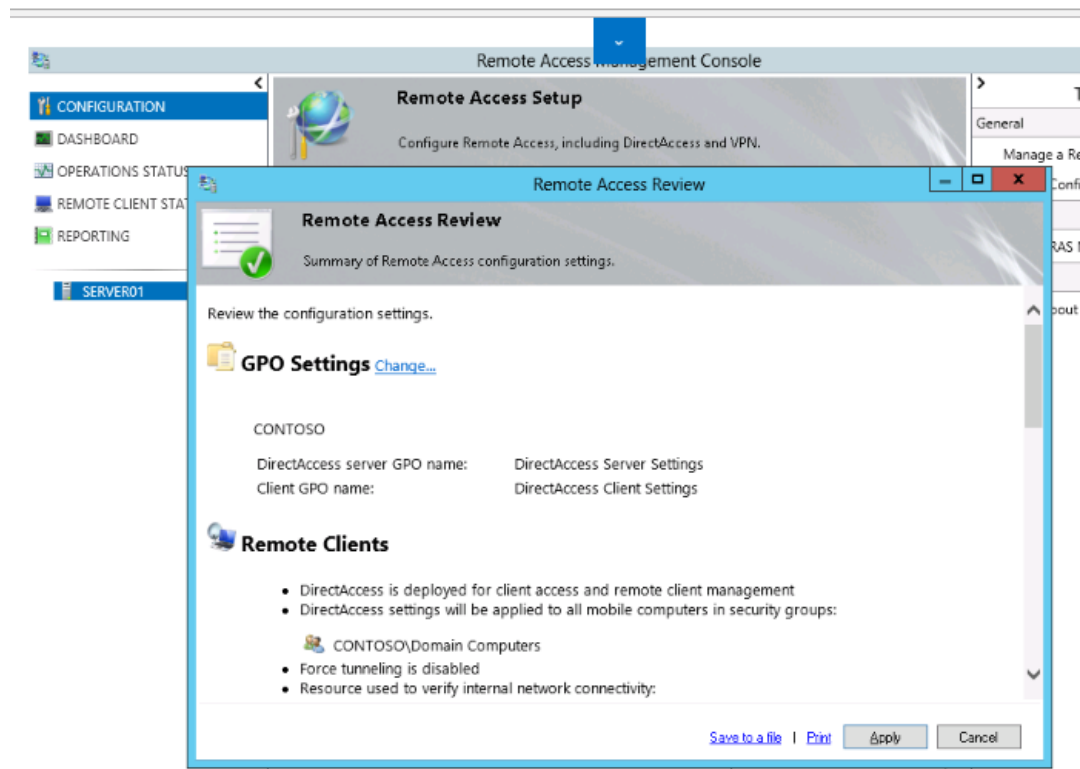

Figure 1 At the bottom of the Remote Access Management console, click Finish to apply all the changes for Steps 1 through 4

4. Take a screen shot of the Remote Access Management Console window by pressing Alt+Prt Scr and then paste it into your Lab011_worksheet file in the page provided by pressing Ctrl+V.

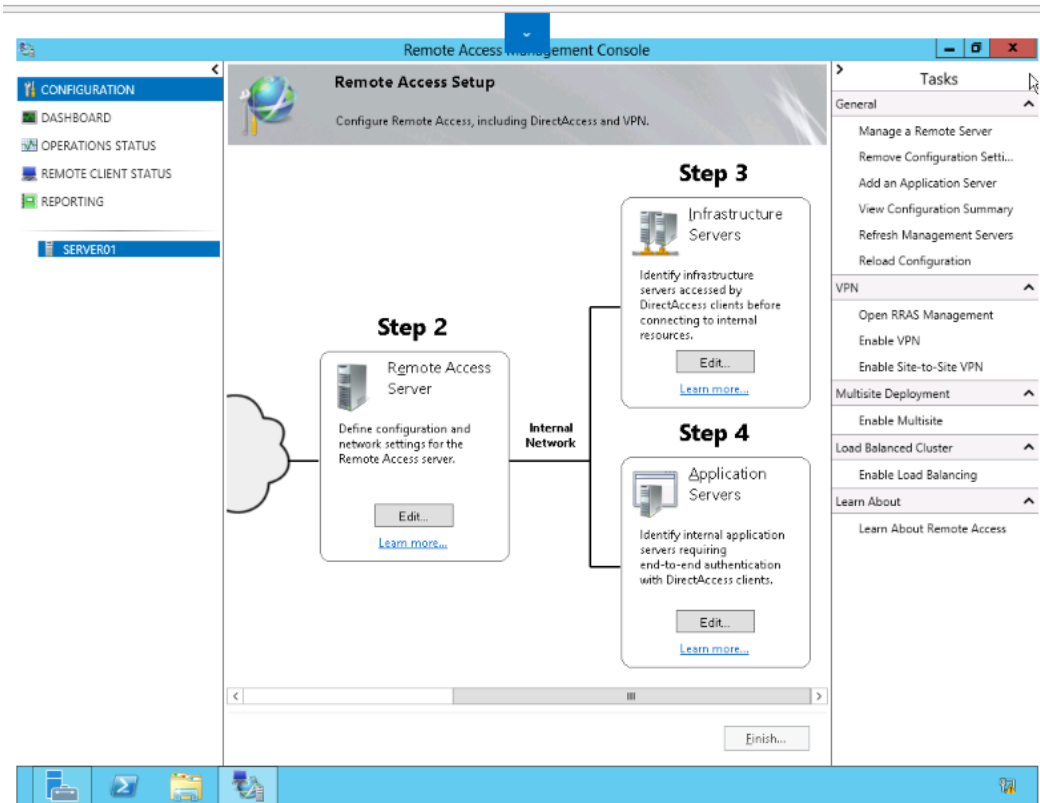

Figure 2 At the bottom of the Remote Access Management console, applied all the changes for Steps 1 through 4

5. When the Remote Access Review dialog box opens, click Apply.
6. When the settings have been applied, click Close. Close the Remote Access Management Console.

Lab Summary

Lastly, during Step 4 of the Remote Access Setup Wizard, I have configured any application servers and apply all the changes that I have configured for Steps 1 through 4. When configuring DirectAccess, finish to apply all the changes for Steps 1 through 4 at the bottom of the Remote Access Management console.
